# Vientiane Transportation Uninterruptible Power Supply Equipment

## Overview

---

How will Vientiane transform the public transport system?

This includes targeting boosting the adoption of two-wheeled and passenger EVs by 30% by 2050; restructuring the country's urban public transport system, particularly in Vientiane; and transitioning 10% of transport fuels to biofuels (SMMR, 2022).

Can Vientiane have a bus rapid transit system?

transport. Much has been done in the way of planning the transport network in Vientiane over the last few years, especially on the development of a Bus Rapid Transit (BRT) system first proposed by the Japan International Cooperation Agency (JICA) and developed by the Asian Development Bank (ADB).

What is Vientiane sustainable urban public transportation (vsupt)?

The Vientiane Sustainable Urban Public Transportation (VSUPT) includes multiple components with the aim to transform the public transport system in the capital and largest city of Lao PDR, Vientiane. The mainstay of this project is a 11.5 BRT busway system through the central area of Vientiane. Other components include:.

What is the demand for transport infrastructure in Vientiane?

Source: Authors. ADB (2010) reported that overall demand for transport infrastructure is minimal, as the traffic volume on the national network (excluding areas surrounding Vientiane and Savannakhet) is below 1,000 units of average annual daily traffic, and below 500 on most other networks.
