# **Warsaw Power Emergency Energy Storage Company**

## Overview

---

Why do we need energy storage facilities in Warsaw?

In summary, the construction of energy storage facilities in Warsaw is a significant step towards enhancing the city's energy infrastructure, supporting the integration of RES, and ensuring a stable and secure power supply for its residents. This article was prepared by Institute of Fluid-Flow Machinery Polish Academy of Sciences.

Will Poland's energy storage initiative help stabilize Warsaw's electricity network?

Source: Renewables Now Poland's eco fund has granted Stoen Operator, part of German utility E.ON, PLN 12 million (USD 3 million/EUR 2.8 million) to co-finance an energy storage initiative aimed at stabilising Warsaw's electricity network.

Will Warsaw benefit from the construction of ten electricity storage facilities?

Warsaw is going to benefit from the construction of ten electricity storage facilities, thanks to a funding boost of over PLN 12 million from the National Fund for Environmental Protection and Water Management (NFOŚiGW).

Why is energy storage important in Poland?

With the rising share of intermittent renewable power, large-scale battery storage systems are becoming critical to maintaining grid stability. By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system.
