What container should I use for the generator

Overview

Do you need a container for a portable generator?

Whether you call it a box, shed, shelter, or enclosure, your generator needs to be protected and integrated into the environment around it. Here are some of the best reasons for building a container for your portable generator.

What are the different types of container generators?

We can supply the 20' container, 40' container, and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location, can run under the most demanding working conditions.

Do power generators need a containment tank?

A containment tank is necessary for all power generators to ensure that all fuels and lubricants are contained and not able to leak onto the floor or ground. Leaking fluids present a health and safety risk to your employees and the environment in and around your facility.

What is container type diesel generator set?

Container type Diesel Generator Set Jet power supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.
