How do I choose a battery storage cabinet?

**Capacity Requirements:** Ensure the cabinet accommodates the quantity and size of batteries used in your workplace. **Regulatory Compliance:** Choose a cabinet that meets safety standards for Class 9 Dangerous Goods. **Durability:** Look for a heavy-duty lithium battery storage case designed for long-term use.

What should a battery cabinet have?

**Insulation system** - insulation is also a safety measure a battery cabinet should have. **Grille** - it allows for free air flow thereby ensuring efficient cooling. **Dual-stage venting system** - It is a common technology in electric vehicle battery systems. The first stage will prevent water ingress and equalize pressure.

Are battery units rack-mounted or cabinet-mounted?

Based on the size, the batteries are rack-mounted if they are above 100 AH and used in cabinets if they are below that level. The number of battery units and the respective size of the battery determines rack or cabinet usage.
