# What is the capacity of the Paris battery storage cabin

## Overview

---

Where is the largest battery-based energy storage facility in France?

Paris, December 21st, 2021 – TotalEnergies has launched the largest battery-based energy storage facility in France. Located at the Flandres center in Dunkirk, this site, which responds to the need for grid stabilization, has a power capacity of 61 MW and a total storage capacity of 61 megawatt hours (MWh).

Will TSLA power France's largest energy storage system?

Tesla (TSLA) has secured a massive new Megapack order that will power France's new largest energy storage system. TagEnergy announced today that it started construction on a new energy storage project in Marne, which should become France's largest battery project. They confirmed that they will use Tesla Megapacks:.

Does Tesla have energy storage capacity?

Tesla's energy division has been on fire this year. It wasn't so long ago that Tesla deployed 480 MWh of capacity in a single quarter. Now, it's a single project like this, and last quarter, the company deployed 6.9 GWh of energy storage capacity – up 75% year-over-year.
