## Overview

---

What is an uninterruptible power supply (UPS)?

A solid Uninterruptible Power Supply (UPS) can be a real lifesaver, keeping everything running smoothly when the lights go out. We've done some digging into the top picks, backed by data and expert review.

Would an uninterruptible power supply have been a lifesaver?

Uh-oh. Power cut, and we're betting you hadn't saved in ages. That's where an uninterruptible power supply (UPS) would genuinely have been a lifesaver. These provide a secondary source of power to your hardware so that even when the main power is cut, you still have some time to save and backup your stuff.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.

How long does an uninterruptible power supply last?

Depending on the kind of generators you have chosen for your use, they give you an uninterrupted power supply for approximately eight to fifteen hours. You can peacefully enjoy your quality leisure hours. If your area frequently faces a power outage, an uninterruptible power supply is a good investment for you.
